PROFILE

Shopify Plus developer and CRO specialist with storefront development experience since 2021. Combine customer research, Liquid development and experimentation to improve product pages, carts and subscription flows. Project experience includes Supply, Blu Atlas, Fifth Ray, TechnoRV and Stryx, with work spanning metaobject pages, Shopify Functions and custom storefront features.

PROFESSIONAL EXPERIENCE

Fifth Ray | Shopify CRO Developer

February 2026 - August 2026 | Contract

- Investigated an observed 51% difference between GA4 and Shopify reporting and rebuilt the analytics implementation to support CRO measurement.
- Analysed 849+ customer reviews and built a customer-language bank to inform product-page content and the test roadmap.
- Rebuilt the product page above the fold and the variant selection module.
- Replaced a third-party cart app with a native Liquid cart drawer to address paid-social traffic failures in in-app browsers.

Foundry Brands | Shopify Developer

2023 - 2025

- Refactored Online Store 2.0 theme architecture across multiple storefronts.
- Built custom Liquid sections for product pages, collections and carts.
- Built subscription flows using Shopify's Subscriptions API, alongside bundle builders, cart logic and upsell features.
- Replaced heavy third-party app components with custom theme sections.

Shopify Plus Developer & CRO Specialist

PROFESSIONAL EXPERIENCE (CONTINUED)

Supply Co | Shopify Developer & CRO Specialist

2021 - 2023

- Owned storefront development, performance work and CRO implementation in collaboration with growth, media and creative teams.
- Rebuilt the storefront for Online Store 2.0 and addressed performance issues on product and collection pages.
- Developed native Liquid sections to replace third-party page-builder components and improve maintainability.
- Implemented Rebuy upsell and cross-sell flows and supported storefront A/B experiments.
- Built campaign landing pages to support paid traffic.

TECHNICAL SKILLS
